

December 10, 2015: Residents may have recently received a card or letter from Constellation Energy offering discounted electricity supply rates. We want to make sure that all Dracut residents and businesses understand that the Constellation Energy offer is not part of the Town's Municipal Aggregation program.

This week, Dracut residents and businesses who are eligible to join the Municipal Aggregation program (bulk buying of electricity) will receive a notification from Con Edison Solutions, the Municipal Aggregation's electrical supplier, which gives households and businesses the option of "opting out" of the program. If you do nothing, you are automatically included in the program, which provides electricity at a discounted price of 9.49 cents per kWh.

Participating in the Municipal Aggregation program should save each household from \$125-150/annually.

Please check the town's website for further information. If you have any questions or comments, please feel free to contact Betsy Ware, Director of Community Development at 978-453-4557.
